## Projects

### Quran App

A responsive, feature-rich Quran reading app with audio recitation, Tafseer, and Hadith integration

- Built using **HTML**, **CSS**, and **JavaScript** following the **MVC design pattern** for clean, scalable code architecture
- Full **Quran navigation**: browse, read, and search Surahs and Ayahs
- Integrated **multiple reciters** with an interactive audio player for a seamless listening experience
- Added **Tafseer explanations** and **Hadith references** to enrich spiritual understanding

🔗 **Live Demo**: <https://qurann1.netlify.app/> ↗

### Quran App V2 (React Edition)

An upgraded and modernized Quran web application built with React, adding advanced features and improved user experience.

- Rebuilt with **Vanilla React**, using a **component-based architecture** for better scalability and maintainability
- Maintains all core features
- **Introduced** Ayah tracking, dark mode, daily Adhkar, and accurate prayer times based on user location.

### BlackLuxe Store

A visually striking, dark-themed e-commerce web application featuring a luxury aesthetic, user-friendly shopping experience, and a powerful admin dashboard

- Built with **Next.js 15**, **TypeScript**, and **Supabase** for a modern, scalable architecture
- Features full **e-commerce flow**: product browsing, cart, wishlist, and checkout
- Secure **user authentication** and real-time backend integration
- Admin dashboard with full **CRUD**: manage products and view customer orders
